

We Do More...So You Don't Have To

Photo-Chemical Metal Etching

- Stainless Steel
- Aluminum
- Brass
- Copper
- Silicon Steel
- Nickel
- Magnetic Alloy
- Beryllium copper
- Steel
- Inconel
- Kovar
- Phosphor Bronze
- Alloy 42
- And many more

PCB Fabrication

- Rigid Boards
- Flex Circuits
- Rigid Flex
- RF/Microwave specialists

At Transline Technology, we are industry-recognized for the outstanding quality and reliability of the rigid printed circuit boards we manufacture; particularly those with RF and Microwave applications.

However, did you know we also make Flex and Rigid-Flex boards as well as offering Metal Etching services?

We invite you visit our freshly-designed website to explore the full line of products and services we offer. There you will see why many of our customers enjoy the convenience and cost savings of using one supplier for multiple products and services.

In some cases, our RF/MW customers may order EMI shields along with their PCBs. Other customers may ask us to bond a stiffener or heat sink to a PCB that we have manufactured.

So, give us a second look, you may be surprised to see all the ways we can do more...so you don't have to!
